EDUCATION

University of Minnesota, Twin Cities — *MN, USA*
Master of Science in Computer Science; GPA: 3.89/4 — *2023 – 2025*

SRM Institute of Science and Technology — *TN, India*
Bachelor of Technology in Computer Science and Engineering; GPA: 9.2/10 — *2019 – 2023*

IIT Madras — *TN, India*
Diploma in Data Science — *2021 – 2023*

SKILLS SUMMARY

Languages & Frameworks: JavaScript, TypeScript, Python, React, Next.js, Flask
Database & Backend: SQL, PostgreSQL, Supabase, Firebase, RESTful APIs, Pinecone, Microservices Architecture
AI & Machine Learning: LangChain, LangGraph, RAG, Agents, Fine-tuning, MCP, Ollama, LiveKit, Hugging Face
Cloud & DevOps: AWS, Docker, Cloud-Native Architecture, Git, GitHub, Figma, Agile, System Design, CI/CD

PROFESSIONAL EXPERIENCE

Rivo, San Francisco — *CA, US*
Member of Technical Staff — *Dec. 2025 – Present*

- Architected and deployed production conversational AI workflows in Python across a cloud-based microservices stack.
- Implemented caching with TanStack Query and endpoint-level invalidation, reducing homepage load time (87% improvement) and significantly improving p95 performance across critical flows.
- Designed and deployed agentic AI workflows for personalized client messaging and internal automation.
- Strengthened production reliability with Playwright E2E coverage, Jest, CI/CD hardening, and Sentry monitoring across fintech-critical user journeys.

Nonlinear, San Francisco — *CA, US*
Founding Engineer — *Aug. 2025 – Dec. 2025*

- Engineered the Universal Node System for AI workflows with dynamic property handling and Zustand-powered state caching, reducing configuration time by 45% and enabling faster feature rollout across the platform.
- Built Agentic RAG pipelines powering context-aware AI agents and a Teams bot, reducing retrieval latency by 60% and tripling user engagement post-launch.
- Delivered production-grade features using Next.js, TypeScript, tRPC, Zustand, Drizzle ORM, and integrated OpenAI models.

Blue Hex Software — *TN, India*
Full Stack AI Developer — *Sep. 2022 – Aug. 2023*

- Led and built a production-grade OCR SaaS using Python, Flask, and REST APIs for automated PDF data extraction.
- Solved backend performance bottlenecks by optimizing SQL queries and schema, improving latency by 30%.

LEADERSHIP / PROJECT EXPERIENCE

LARK: Multi-Agent Orchestration MCP — 🏆 Top 10, Y Combinator AI Hackathon — github.com/anirxdh/YC-hack

- Built a hierarchical multi-agent system using Model Context Protocol (MCP), orchestrating 3 specialized child servers (media, messaging, telephony) through a unified parent MCP with dynamic tool selection and routing.
- Enabled real-time cross-platform communication (calls, group calls, messaging) directly from conversational AI interfaces (ChatGPT, Claude), eliminating context-switching across tools.
- Deployed via mcp-use with end-to-end agent orchestration, tool-invocation tracing, and multi-user session handling.

TalkativePDF (AI-Powered PDF Chat Platform) — talkative-pdf.vercel.app

- Developed a SaaS app end-to-end with GPT-4, LangChain, and Pinecone for semantic document Q&A.
- Solved the need for fast, conversational PDF insights using RAG-based architecture and document chunking.
- Improved query response time by 87% and handled over 500+ document uploads during internal testing.

PATENTS / PUBLICATIONS

- Contact-less Integrated Voting System — Granted Patent: Patent ID 202341031598, May 2023.
- A Deep Convolutional Neural Network for Remote Life Activities Detection using FMCW Radar under Realistic Environments — Springer.
