EDUCATION

University of Minnesota, Twin Cities

Master of Science in Computer Science; GPA: 3.89/4

MN, USA

2023 - 2025

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering; GPA: 9.2/10

TN, India

2019 - 2023

IIT Madras

Diploma in Data Science

TN, India

2021 - 2023

SKILLS SUMMARY

Languages & Frameworks: JavaScript, TypeScript, Python, React, React Native, Next.js, Flask

Database & Backend: SQL, PostgreSQL, Supabase, Firebase, RESTful APIs, Pinecone, Microservices Architecture

AI & Machine Learning: LangChain, Langgraph, RAG, Agents, Fine-tuning, MCP, Ollama, LiveKit, Hugging Face

Analytics & Growth: Google Tag Manager, GA4, Mixpanel, Statsig, Meta / TikTok / Reddit / Google Ads

Cloud & DevOps: AWS, Docker, Git, GitHub, Figma, Agile, System Design, CI/CDPlaywright, Maestro, Jest

PROFESSIONAL EXPERIENCE

Rivo, San Francisco

CA, US

Member of Technical Staff

Dec. 2025 – Present

- Deployed production conversational and agentic AI in Python on cloud microservices, plus LiveKit voice agents that capture leads and an internal support chatbot.
- Implemented TanStack Query caching with endpoint-level invalidation, cutting homepage load time **87%** and improving p95 across critical flows.
- Own and maintain the iOS and web apps on one React Native codebase migrated from Next.js, hardened with Playwright and Maestro E2E tests and Sentry monitoring with testing workflows.
- Own product analytics and growth for a B2C fintech app, running full-funnel tracking and paid ads across TikTok, Meta, Reddit, and Google.
- Shipped a scalable, admin-configurable referral system the team extends without engineering.
- Built an automated pipeline that generates UGC-style video ads end to end.

Nonlinear, San Francisco

CA, US

Founding Engineer

Aug. 2025 – Dec. 2025

- Engineered the Universal Node System for AI workflows with dynamic property handling and a Zustand-powered state caching, reducing configuration time by 45% and enabling faster feature rollout across the platform.
- Built Agentic RAG pipelines powering context-aware AI agents and a Teams bot, reducing retrieval latency by 60% and tripling user engagement post-launch.

Blue Hex Software

TN, India

Full Stack AI Developer

Sep. 2022 – Aug. 2023

- Led and Built a production-grade OCR SaaS using Python, Flask, and REST APIs for automated PDF data extraction.
- Solved backend performance bottlenecks by optimizing SQL queries and schema, improving latency by 30%.

LEADERSHIP/PROJECT EXPERIENCE

RUA (Privacy-First AI Assistant for Caregivers) - [\[LINK\]](#)

- Solo-built and shipped an iOS (TestFlight) and web app for family caregivers, with an integrated voice agent for the people in their care and a privacy-first design that keeps records encrypted and grounded to the user's own data.
- Built the paperwork automation as configurable node-and-edge workflows that draft insurance appeals, prior-auth packets, and Medicaid renewals, cutting a denial appeal from 3.5 hours to 12 minutes.
- Shipped the core features: medication and inventory tracking with refill runway, ER sheets, appointment prep, and Ask RUA, the AI assistant that answers from the user's records.

YouTube Shorts Factory (Automated UGC Video Engine + Dashboard)

- Built an end-to-end pipeline that turns a topic into a published Short (LLM scripting, Fal.ai image and video, ElevenLabs TTS, Whisper subtitles), fully auto-uploaded.
- Runs 4 channels on daily cron via GitHub Actions, with a review-and-approve dashboard.

PATENTS, PUBLICATIONS & ACHIEVEMENTS

- Contact-less Integrated Voting System - Granted Patent: Patent ID: 202341031598, May 2023 - [\[LINK\]](#)
- ConsensusDrift: Semantic Saliency Can Override Majority Evidence in LLM Aggregation, **EMNLP 2026 (Main C)**
- **5x Hackathon Winner**, with multiple ElevenLabs sponsor prizes plus Replit and Zed.
- A Deep CNN for Remote Life Activities Detection using FMCW Radar under Realistic Environments - [\[LINK\]](#)
